PROFESSIONAL SUMMARY

Laravel Backend Developer with 2.6 years of experience building RESTful APIs, webhook-based automation systems, payment gateway integrations, and scalable backend applications. Experienced in Laravel, MySQL, real-time systems, queue handling, CRM synchronization, and VPS deployments. Built production-grade backend solutions across healthcare, recruitment, marketing, and SaaS domains.

EDUCATION

AKTU University

Bachelor of Technology in Computer Science (77%)

Uttar Pradesh

Aug 2019 – Jun 2023

EXPERIENCE

Laravel Backend Developer

Feb 2024 – Present

Baseline IT Development

Chandigarh

- Designed and developed RESTful APIs in PHP to synchronize data across CRM, accounting, and logistics platforms.
- Implemented webhook listeners for real-time event processing with retry handling and failure recovery mechanisms.
- Monitored and debugged API failures, handled webhook retries, and resolved production data inconsistencies.
- Built middleware services to maintain data consistency across multiple third-party systems.
- Integrated payment gateways (Stripe, PayPal, Razorpay, Oppwa) with transaction verification and error handling.
- Designed and managed MySQL database tables and validation logic for synchronized records.
- Collaborated with clients to convert business workflows into backend system logic and automated processes.

PROJECTS

College Admission REST API | *Laravel, MySQL, Sanctum, REST APIs, Queues*

- Developed a RESTful backend system for managing colleges, courses, and student admission workflows using Laravel MVC architecture.
- Implemented secure authentication and route protection using Laravel Sanctum and middleware.
- Designed relational database schemas and optimized Eloquent relationships for efficient data handling.
- Implemented queue-based background job processing for notifications and asynchronous tasks.
- Optimized database queries using eager loading and query optimization techniques to prevent N+1 issues.

Payment Gateway Integration - Transaction Handling | *PHP, MySQL, REST APIs, Webhooks*

- Integrated Stripe, PayPal, and Razorpay using secure REST APIs.
- Processed payment events via webhooks and stored transaction records reliably.
- Implemented validation and automated order status updates based on payment events.

Event-Driven CRM Synchronization Service | *PHP, MySQL, REST APIs, Webhooks*

- Built backend middleware to synchronize leads, contacts, and deals across multiple systems.
- Implemented webhook-based real-time updates with retry handling and duplicate prevention.
- Designed idempotency checks to maintain data consistency.

TECHNICAL SKILLS

Languages: PHP, SQL, JavaScript (basic)

Backend: Laravel, REST API Development, Webhooks, Authentication, Middleware, Queues, API Validation, Livewire, Laravel Reverb

Database: MySQL, Database Schema Design, Query Debugging

Integration: Third-party API Integration, Payment Gateway Integration

Developer Tools: Git, GitHub, Postman, Composer, Linux VPS, Nginx, Cloudflare, CI/CD

ACHIEVEMENTS

Received multiple performance recognitions including 5× Employee of the Month and company-wide “True Gem” award for contributions to backend automation and system reliability.
